

W-Z Wireless System

Wireless Industrial RTUs, I/Os, and sensors

INICO...

Introducing the W-Z Industrial Wireless system from Inico Technologies

The W-Z is a comprehensive family of industrial wireless devices, which includes wireless RTUs, wireless I/O modules, and wireless sensors. Based on industry-standard protocols and proven, reliable communication technology, the W-Z system offers versatile solutions to typical industrial applications where wiring is not viable or cost-effective.

Features:

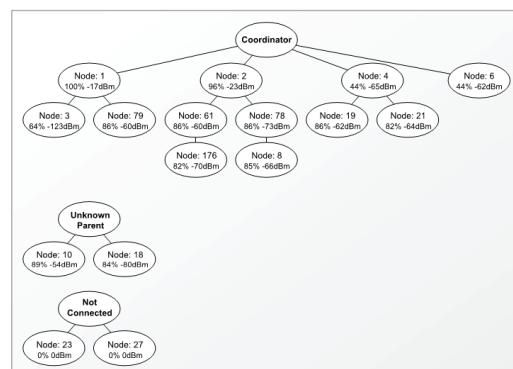

- Zigbee PRO network
 - 2.4GHz IEEE 802.15.4 radio
 - 250kps data rate, 100m range per link
 - Mesh networking, redundant routing paths
 - 100s of devices per network
- Discrete and analog values
- Smart data transfer: polling and/or eventing

Devices:

- Add-on module for S1000 RTU: coordinator, router, and endpoint
- Digital inputs, pulse counter, analog inputs
- Temperature, humidity, ambient light
- Pushbutton operator interface
- Energy monitor

Applications:

- Distributed automation systems
- Wireless instrumentation
- Wireless sensor networks
- Smart buildings
